

Viral Twitter Thread Framework

Your Content

"I analyzed 10,000 buyside analyst writeups and here are the X things that Y"

THE FRAMEWORK

1. HOOK (Tweet 1) The Stop-Scroller

Formula: [Credibility] + [Big Number] + [Surprising Finding] + [Promise]

Template:

I analyzed 10,000 buyside analyst reports from top hedge funds.

[X]% of the best performers do the same [Y] things.

Here's what separates the signal from the noise:

Why it works:

- 10,000 = massive sample size (credibility)
- buyside analyst reports = insider access (exclusivity)
- top hedge funds = aspirational audience
- X% = specific number creates curiosity gap
- signal from noise = pain point for finance Twitter

Alternative hooks:

I read 10,000 investment theses so you don't have to.

The best analysts all do one thing differently.

(It's not what you think)

Most investment theses fail for the same 3 reasons.

I analyzed 10,000 reports to prove it.

Here's what the top 1% do instead:

2. STRUCTURE (Tweets 2-N)

The "I Analyzed" Thread Arc:

Tweet #	Purpose	Example
----- ----- -----		
1	Hook	The big claim + promise
2	Methodology credibility	"How I did this: I scraped V
3	Surprising stat #1	"73% of winning picks had th
4	Insight + mini-story	"One analyst nailed TSLA in
5	Contrarian finding	"Shorter writeups actually o
6	Tactical takeaway	"If you want to write better
7	Visual break	Chart/table/screenshot
8-10	Additional findings	One insight per tweet
11	Self-deprecating or human mo	"I expected to find X, but w
Final	CTA + bookmark prompt	"Save this thread. I'm shari

3. ENGAGEMENT MECHANICS

Open Loops (keep them reading):

- End tweets with "But here's the thing..." or "That's not even the craziest part:"
- Tease next insight at end of each tweet

Specificity Signals:

- Use exact numbers: "73%" not "most"
- Name-drop real funds/analysts (if public info)
- Reference specific tickers that hit

Pattern Interrupts:

- Tweet 4 or 5: Personal story or admission
- Tweet 7: Image/chart (visual break)
- Final tweet: Direct ask ("RT if useful")

Controversy Injection:

- Challenge conventional wisdom: "Long writeups don't predict returns"
 - Call out bad practices: "Stop doing X it doesn't work"
-

4. TIMING & POSTING

- Best times: 8-10am EST (market open crowd) or 7-9pm EST
 - First 30 min critical: Reply to every comment
 - Quote-tweet your own hook 4 hours later with new angle
-

5. PROMPT TEMPLATE FOR GENERATION

Write a viral Twitter thread using this framework:

CONTENT SOURCE: [Your findings/data]

THREAD STRUCTURE:

1. HOOK: Use "I analyzed [number] [thing]" format with surprising stat
2. CREDIBILITY: Brief methodology (1 tweet)
3. FINDINGS: 5-7 insights, one per tweet, most surprising first
4. PROOF: Include specific examples, numbers, names where possible
5. HUMANITY: One tweet that shows personal take or surprise
6. CTA: End with save/bookmark prompt + tease future content

STYLE RULES:

- Max 240 characters per tweet (leave room for engagement)
- Start each tweet with the insight, not preamble
- Use numbers and specificity over vague claims
- One idea per tweet, no multi-point tweets
- Contrarian > Obvious
- End 3+ tweets with open loops

AVOID:

- Generic advice everyone knows
 - "Here's a thread on..." openings
 - Asking for engagement ("like if you agree")
 - More than 12 tweets total
-
-

READY-TO-USE TEMPLATE (Winners Angle)

Copy this structure. Fill in the [brackets] with your data.

TWEET 1 HOOK

I analyzed [X,XXX] buyside analyst reports from VIC and top hedge funds.

[XX]% of the picks that 2x'd had the same [X] things in common.

Here's what separates the winners:

TWEET 2 CREDIBILITY

First, how I did this:

- Scraped [X] years of VIC ideas
- Tracked returns vs S&P
- Tagged thesis elements (catalyst, valuation, moat, etc.)
- Filtered for [2x+ winners / top decile / etc.]

Here's what the data showed:

TWEET 3 FINDING #1 (Most Surprising)

Finding #1: [XX]% of winning theses had [SPECIFIC ELEMENT].

Not [obvious thing]. [Specific element].

Example: [ANALYST] called [TICKER] in [YEAR] because [REASON].

It [X]x'd in [Y] months.

TWEET 4 FINDING #2

Finding #2: Thesis length didn't predict returns.

But [ALTERNATIVE METRIC] did.

Winners averaged [X]. Losers averaged [Y].

The difference: [ONE SENTENCE INSIGHT]

TWEET 5 CONTRARIAN INSIGHT

This surprised me:

[COMMON WISDOM] didn't correlate with returns.

[UNEXPECTED FACTOR] did.

The best analysts [DID/DIDN'T] do [THING].

TWEET 6 THE "WHY"

Why does this matter?

Most analysts spend time on [X].

Winners spend time on [Y].

The edge isn't [OBVIOUS THING] it's [INSIGHT].

TWEET 7 VISUAL BREAK

Here's the data:

[CHART/TABLE IMAGE]

[One sentence explaining what to look at]

TWEET 8 SPECIFIC EXAMPLE

Best example:

[ANALYST/FUND] wrote about [TICKER] in [DATE].

Their thesis: [1 SENTENCE]

Result: [XX]% return in [TIMEFRAME]

Key insight: [WHAT THEY SAW]

TWEET 9 TACTICAL TAKEAWAY

If you want to write better theses:

1. [DO THIS]
2. [NOT THIS]
3. [AND THIS]

The winners aren't smarter. They're [ADJECTIVE].

TWEET 10 HUMANITY

Honestly, I expected [X].

I was wrong.

The data changed how I think about [Y].

TWEET 11 CTA

Save this thread.

I'm building a [TOOL/DATASET/ANALYSIS] that [VALUE].

Follow for more.

If this was useful, RT the first tweet.

ANALYSIS NEEDED FROM VIC DATA

Before you can fill this in, extract:

Data Point	What to Find
----- -----	
Win rate	% of ideas that beat S&P by
Common elements	Tag each thesis: catalyst ty
Correlations	Which elements correlate wit
Best examples	3-5 specific ideas with name
Surprise finding	What you expected vs what th

NEXT STEPS

1. Run analysis on VIC parsed data to extract insights
 2. Fill in template above
 3. Create 1-2 charts/visuals for tweet 7
 4. Test hook on finance friends
 5. Post at 8am EST or 7pm EST
-

VERIFICATION

Test the hook on a few people before posting. Good hook = "wait, really?" reaction.
